

Resume of Enes Yavuz Kozan

BSc Computer Science and Engineering – TU Delft

eykozan2004@gmail.com | [Enes Yavuz Kozan | LinkedIn/](#) | [SineNomine998 \(Enes Yavuz Kozan\)](#)

Education

Sep 2023 - Present

Bachelor of Computer Science and Engineering, *Delft University of Technology*

Track: Data

Minor: NeuroAI: The Computing Brain, *Erasmus University*

Expected graduate date: June/July 2027

Feb 2019 - June 2023

High School, *Wolfert Dalton, Rotterdam*

Profile: Nature & Technology combined with Nature & Health, average 8.0

Graduated cum laude

Relevant Experience

Sep 2025 - Present

Student Software Engineer at **Coding the Curbs**, *Amsterdam (remote)*

Working on the project [TaxiBuffer](#) for **Gemeente Rotterdam**, **Cruise Terminal**

Rotterdam and **Coding the Curbs**. TaxiBuffer is a Django-based taxi queue coordination system. It helps move chauffeurs from buffer zones to pickup zones in a controlled way, with queue status tracking, officer monitoring, and sensor-driven pickup occupancy updates.

You can visit the site [taxibuffer.nl](#) to see the latest version in production.

- Gained technical experience in servers, DevOps, sensory processing/integration.
- Gained experience in testing with real users and adapting the system/program accordingly.

Mar 2025 - Aug 2025

Internship at **Coding the Curbs**, *Amsterdam (on-site)*

Contributed to developing smart solutions to improve how cities use their public space. From sensors and data to digital platforms and on-street interventions. I was involved in research, concept development, and testing ideas in real city environments.

- Learned to work in a professional setting.
- Gained technical experience in Python, Django, REST APIs, Postman API, PostgreSQL, PostGIS, database creation/management.
- Gained experience in Senior - Junior developer relations, working in a start-up, working in a flexible and fast-evolving environment.

Apr 2025 - July 2025

Internship at **Erasmus MC**, *Rotterdam*

Contributed to developing a mobile application for colorectal cancer patients who are discharged from the hospital but still need to continue their treatments, as a part of the PROMISE project.

- Learned to work together as a team.
- Gained technical experience in Dockerization, Dart, Flutter, API creation, mobile development, user tokens, software design, software development.
- Gained experience in Customer - Developer relations, featurization, Agile Development

Additional skills

Backend: Java, Python, C#, C++, Spring Boot

Frontend: JavaScript, TypeScript, HTML, CSS, React Native

Data & Analytics: Python, SQL, Scala, data analysis/data mining

Volunteering Experience

Nov 2024 - Present

Temma (remote)

Answering questions from high school students about studying CSE at TU Delft.
